RELEVANT EXPERIENCE

Full Stack Developer @ Uprise Fiber
June - September 2021
- Worked on a customer facing ISP app & an internal ISP CMS app using PHP, Laravel, MySQL, React & React's context system API for state management.
- Managed time sensitive updates, that include debugging, refactoring & adding new logic to files.
- Implemented API call offset functionality throughout components & controllers to ensure future scalability & performance.
- Developed a rollback feature so technician employees can navigate pages without losing their previous page & table data saving hours a week in navigation & search times while out in the field.
- Built a messaging system feature which allows internal users to search & select any or all customers & send them email or sms messages.

PROJECTS

Various projects using javascript and 3rd party web tools and services
Rolodex: myrolodex.me
- Full stack app made to help streamers grow their twitch channel.
- Built with React, Bootstrap, Node.js, MongoDB & Twitch API.
- Utilized a javascript based live streaming API to achieve an engaging UX.
- Gained strong Node.js skills by building out server API routes & controllers.

Tech Factory: tech-factory.herokuapp.com
- Built with React, Redux, Bootstrap, Node.js, MongoDB & Paypal API.
- Full stack eCommerce app where users can login to shop and purchase products.
- Admin portal where products and deliveries can be updated.

Hair Salon: hair-salon-site.herokuapp.com
- Built with Vue, Node.js, MongoDB & Three.js.
- Clients can browse through services & book appointments.
- Employees can login to a dashboard to view, update & delete appointments.

Algorithm Archive: algorithm-archive.org
- Worked as an open source project contributor.
- Collaborated with other developers on implementing new features.
- Mastered a new code base, git branching and pull requests.

EDUCATION

De Anza College / Cupertino, CA / 2014-2015
- General education and prerequisite courses

SKILLS

Languages
JavaScript, TypeScript, HTML, CSS/Sass, PHP, SQL, Blade, Liquid

Libraries & Frameworks
React, Redux, Vue, jQuery, Node.js, Express, Bootstrap, Tailwind, Laravel, Next.js, Jest

Tools & Platforms
Git, Github, Gulp, Netlify, Heroku, AdobeXD, Shopify, AWS(s3, route53, cloudfront), CI/CD

COURSES & TRAINING

Codecademy
Code Foundations

Treehouse
Frontend Web Development

freeCodeCamp
Responsive Web Design & Frontend Libraries

JavaScript Masterclass
JavaScript Algorithms & Data Structures

Web Developer Bootcamp
HTML, CSS JavaScript, Node.js, Express

Modern React with Redux
React hooks, props, functional components, class components, life cycle methods, routing & redux
